

MATH 244: Introduction to Probability Theory

Fall 2022 Course Syllabus

NJIT Academic Integrity Code: All Students should be aware that the Department of Mathematical Sciences takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

COURSE INFORMATION

Course Description: Train students in elementary probability. Topics include basic probability theory in discrete and continuous sample space, conditional probability and independence, Bayes' theorem, random variables and their distributions, joint distributions, expected values and variance, moment generating functions, parametric families of distributions including binomial, multinomial geometric, hypergeometric, exponential, gamma, and normal.

Number of Credits: 3

Prerequisites: MATH 112 with a grade of C or better or MATH 133 with a grade of C or better.

Course-Section and Instructors:

Course-Section	Instructor
Math 244-001	Professor S. Subramanian

Office Hours for All Math Instructors: [Fall 2022 Office Hours and Emails](#)

Required Textbook:

Title	Mathematical Statistics with Applications
Author	Wackerly
Edition	7th
Publisher	Cengage Learning
ISBN #	9780495110811

University-wide Withdrawal Date: The last day to withdraw with a M is **Monday, November 14, 2022**. It will be strictly enforced.

COURSE GOALS

Course Outcomes: On successful completion student will be able to demonstrate understanding of

1. Discrete and continuous random variables and their cumulative distribution function.
2. Joint distributions and marginal and conditional distributions.
3. The Bayes theorem, independence, expectation, and moment generating functions.
4. Distributions such as binomial, multinomial, geometric, Poisson, normal, and gamma.

Course Assessment: Will be based on homework/quizzes, one midterm exam and one final exam.

POLICIES

DMS Course Policies: All DMS students must familiarize themselves with, and adhere to, the [Department of Mathematical Sciences Course Policies](#), in addition to official [university-wide policies](#). DMS takes these policies very seriously and enforces them strictly.

Grading Policy: The final grade in this course will be determined as follows:

Homework & Quizzes	30%
Midterm Exam	35%
Final Exam	35%

Your final letter grade will be based on the following tentative curve.

A	90 - 100	C	68 - 74
B+	85 - 89	D	50 - 67
B	80 - 84	F	0 - 49
C+	75 - 79		

Attendance Policy: Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the [Math Department's Attendance Policy](#). This policy will be strictly enforced.

Homework/Quiz Requirements: Homework assignments are due within a week unless announced otherwise by the instructor. Late homework will not be accepted. Attendance at all quizzes and exams is mandatory

Exams: One midterm and one final examination will be given as shown below. The midterm exam date is tentative and may be subject to change.

Midterm Exam	October 31, 2022
Final Exam Period	December 16 - 22, 2022

The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and fully understand the [Math Department's Examination Policy](#). This policy will be strictly enforced.

Makeup Exam Policy: There will be **NO MAKE-UP QUIZZES OR EXAMS** during the semester. In the event an exam is not taken under rare circumstances where the student has a legitimate reason for missing the exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor’s note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the Math Department Office/Instructor that the exam will be missed.

Cellular Phones: All cellular phones and other electronic devices must be switched off during all class times.

ADDITIONAL RESOURCES

Math Tutoring Center: Located in the Central King Building, Lower Level, Rm. G11 (See: **Fall 2022 Hours**)

Further Assistance: For further questions, students should contact their instructor. All instructors have regular office hours during the week. These office hours are listed on the Math Department’s webpage for **Instructor Office Hours and Emails**.

Accommodation of Disabilities: The Office of Accessibility Resources and Services (OARS) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Scott Janz, Associate Director of Disability Support Services at **973-596-5417** or via email at **scott.p.janz@njit.edu**. The office is located in Kupfrian Hall, Room 201. A Letter of Accommodation Eligibility from the Office of Accessibility Resources and Services office authorizing your accommodations will be required.

For further information regarding self identification, the submission of medical documentation and additional support services provided please visit the **Office of Accessibility Resources and Services (OARS)** website.

Important Dates (See: **Fall 2022 Academic Calendar, Registrar**)

Date	Day	Event
September 5, 2022	Monday	Labor Day
September 6, 2022	Tuesday	First Day of Classes
September 12, 2022	Monday	Last Day to Add/Drop Classes
November 14, 2022	Monday	Last Day to Withdraw
November 22, 2022	Tuesday	Thursday Classes Meet
November 23, 2022	Wednesday	Friday Classes Meet
November 24 to November 25, 2022	Thursday and Friday	Thanksgiving Recess - Closed
November 26, 2022	Saturday	Saturday Classes Meet
December 14, 2022	Wednesday	Last Day of Classes
December 15, 2022	Thursday	Reading Day

December 16 to December 22, 2022	Friday to Thursday	Final Exam Period
-------------------------------------	-----------------------	-------------------

Course Outline

Week	Lecture	Sections	Topic
1	9/8 (R)	2.3-2.4	Sample space, events
2	9/12 (M)	2.5	Calculating the probability of an event
2	9/15 (R)	2.6	Tools for counting sample points
3	9/19 (M)	2.7	Conditional probability and independence
3	9/22 (R)	2.8	Multiplicative and additive laws
4	9/26 (M)	2.9	Law of total probability
4	9/29 (R)	2.10	Bayes Rule
5	10/03 (M)	3.2	Discrete probability distribution
5	10/06 (R)	3.3	Expected value of a random variable
6	10/10 (M)	3.4	Binomial distribution
6	10/13 (R)	3.5-3.6	Geometric and Negative Binomial distributions
7	10/17 (M)	3.7-3.8	Hypergeometric and Poisson distributions
7	10/20 (R)	3.4-3.5	Joint Probability Distributions - continued
8	10/24 (M)	3.9	Moment generating function
8	10/27 (R)	3.11	Tchebysheff's theorem
9	10/31 (M)		Midterm Exam, Monday, October 31, 2022
9	11/03 (R)	4.2-4.3	Continuous random variables and expected values
10	11/07 (M)	4.4	Uniform distribution
10	11/10 (R)	4.5	Normal distribution
11	11/14 (M)	4.6	Gamma distribution
11	11/17 (R)	4.7	Beta distribution
12	11/21 (M)	5.3	Joint, marginal, and conditional distributions
13	11/22 (R schedule)	5.4	Independent random variables
13	11/28 (M)	5.5	Expectation of a function of random variables
14	12/01 (R)	5.7-5.8	Covariance and other formulas
14	12/05 (M)	5.9	Multinomial distribution

15	12/08 (R)	6.2-6.3	Transformations; the cdf technique
15	12/12 (M)	6.4	Continuous transformations
