

## MATH 322: Differential Equations for Applications

### *Fall 2022 Course Syllabus*

**NJIT Academic Integrity Code:** All Students should be aware that the Department of Mathematical Sciences takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

### COURSE INFORMATION

**Course Description:** An applied science study using differential equations as the vehicle for comprehension of the unknown. Introduction to first-order differential equations and their applications to motion, cooling and electromechanical systems followed by higher order differential equations and their solutions. And includes Laplace transforms and numerical methods.

**Number of Credits:** 3

**Prerequisites:** **MATH 112** with a grade of C or better, or **MATH 133** with a grade of C or better or **MATH 238** with a grade of C or better.

**Course-Section and Instructors:**

Course-Section	Instructor
Math 322-001	Professor R. Plastock
Math 322-003	Professor R. Plastock
Math 322-101	Professor R. Plastock

**Office Hours for All Math Instructors:** [Fall 2022 Office Hours and Emails](#)

**Required Textbook:**

<b>Title</b>	<i>Differential Equations w/ Boundary-Value Problems (Bundle w/ WebAssign)</i> <b>Buy through WebAssign login page</b>
<b>Author</b>	Dennis G. Zill and Warren S. Wright
<b>Edition</b>	9th
<b>Publisher</b>	Pearson
<b>ISBN #</b>	978-1337604901

Technology	Laptop Computer
------------	-----------------

**University-wide Withdrawal Date:** The last day to withdraw with a **M** is **Monday, November 14, 2022**. It will be strictly enforced.

## COURSE GOALS

### Course Objectives

- Derive solutions of separable and linear first-order differential equations.
- Interpret solutions of differential equation models in mechanics, circuits, &c.
- Derive solutions of linear second order equations or systems that have constant coefficients.
- Apply the Laplace transform to solve forced linear differential equations.

### Course Outcomes

- Prepare students for further study in technological disciplines and more advanced mathematics courses.
- Students have an understanding of the importance of differential equations in the sciences and engineering.

## POLICIES

**DMS Course Policies:** All DMS students must familiarize themselves with, and adhere to, the **Department of Mathematical Sciences Course Policies**, in addition to official **university-wide policies**. DMS takes these policies very seriously and enforces them strictly.

**Grading Policy:** The final grade in this course will be determined as follows:

Quizzes	15%
Midterm Exam I	25%
Midterm Exam II	25%
Final Cumulative Exam	35%

Your final letter grade will be based on the following tentative curve.

A	89.1 - 100	C+	75.1 - 79
B+	85.1 - 89	C	69.1 - 75
B	79.1 - 85	D	39.1 - 69

**Attendance Policy:** Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the **Math Department's Attendance Policy**. This policy will be strictly enforced.

**Exams:** There will be two exams during the semester and a cumulative final exam during the final exam week:

Midterm Exam I	Week 5
----------------	--------

Midterm Exam II	Week 10
Final Exam	December 16 - 22, 2022

The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and fully understand the [Math Department's Examination Policy](#). This policy will be strictly enforced.

**Makeup Exam Policy:** There will be **NO MAKE-UP QUIZZES OR EXAMS** during the semester. In the event an exam is not taken under rare circumstances where the student has a legitimate reason for missing the exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor's note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the Math Department Office/Instructor that the exam will be missed.

**Cellular Phones:** All cellular phones and other electronic devices must be switched off during all class times.

## ADDITIONAL RESOURCES

**Math Tutoring Center:** Located in the Central King Building, Lower Level, Rm. G11 (See: [Fall 2022 Hours](#))

**Further Assistance:** For further questions, students should contact their instructor. All instructors have regular office hours during the week. These office hours are listed on the Math Department's webpage for [Instructor Office Hours and Emails](#).

**Accommodation of Disabilities:** The Office of Accessibility Resources and Services (OARS) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Scott Janz, Associate Director of Disability Support Services at [973-596-5417](tel:973-596-5417) or via email at [scott.p.janz@njit.edu](mailto:scott.p.janz@njit.edu). The office is located in Kupfrian Hall, Room 201. A Letter of Accommodation Eligibility from the Office of Accessibility Resources and Services office authorizing your accommodations will be required.

For further information regarding self identification, the submission of medical documentation and additional support services provided please visit the [Office of Accessibility Resources and Services \(OARS\)](#) website.

**Important Dates** (See: [Fall 2022 Academic Calendar, Registrar](#))

Date	Day	Event
September 5, 2022	Monday	Labor Day
September 6, 2022	Tuesday	First Day of Classes
September 12, 2022	Monday	Last Day to Add/Drop Classes
November 14, 2022	Monday	Last Day to Withdraw
November 22, 2022	Tuesday	Thursday Classes Meet
November 23, 2022	Wednesday	Friday Classes Meet

November 24 to November 25, 2022	Thursday and Friday	Thanksgiving Recess - Closed
November 26, 2022	Saturday	Saturday Classes Meet
December 14, 2022	Wednesday	Last Day of Classes
December 15, 2022	Thursday	Reading Day
December 16 to December 22, 2022	Friday to Thursday	Final Exam Period

## Course Outline

Week	Section	Topic
1	Review of Calculus	Differentiation, integration, Partial differentiation
2	1.1,1.2, 1.3	Introduction to Differential Equations
3	2.1,2.2,2.3	Separable Equations, Linear Equations, Autonomous Diff. Eq.
4	3.1,3.2,3.3	Modeling with First Order Diff. Eq.
5	4.1,4.3	High Order Linear Equations, Homogeneous Equations
	<b>REVIEW</b>	
	<b>MIDTERM EXAM I</b>	
6	4.1.3,4.4	Nonhomogeneous Equations, Method of Undetermined Coefficients
7	5.1,5.2,5.3	Modeling with 2nd Order Linear Diff. Eq., Spring/Mass Systems, Nonlinear Models
8	7.1,7.2, 7.3	Laplace Transforms, Inverse Transforms
9	7.3,7.4,7.5	Operational Properties of Laplace Transform, Dirac Delta Function
10	<b>REVIEW</b>	
	<b>MIDTERM EXAM 2</b>	
11	8.1,8.2	Homogeneous Linear Systems and Laplace Transform
12	8.3	Nonhomogeneous Linear Systems
13	9.1	Numerical Solutions, Euler Methods
14	9.2	Runga-Kutta Methods
15	Review	REVIEW FOR FINAL EXAM
<b>FINALS</b>	<b>December 16 - 22, 2022</b>	

*Updated by Professor Professor R. Plastock - 9/14/2022
