

MATH 331: Introduction to Partial Differential Equations *Spring 2023 Course Syllabus*

NJIT Academic Integrity Code: All Students should be aware that the Department of Mathematical Sciences takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating or plagiarizing will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu

COURSE INFORMATION

Course Description: Partial differential equations in science and engineering. Topics include initial- and boundary-value problems for parabolic, hyperbolic, and elliptic second-order equations. Emphasis is placed on separation of variables, special functions, transform methods, and numerical techniques.

Number of Credits: 3

Prerequisites: MATH 211 or MATH 213 and MATH 222 all with a grade of C or better.

Course-Section and Instructors:

Course-Section	Instructor
Math 331-002	Professor L. Cummings

Office Hours for All Math Instructors: [Spring 2023 Office Hours and Emails](#)

Required Textbook:

Title	<i>Applied Partial Differential Equations</i>
Author	Richard Haberman
Edition	5th
Publisher	Pearson Prentice-Hall
ISBN #	978-0321797056

Website	Canvas
---------	--------

University-wide Withdrawal Date: The last day to withdraw with a W is **Monday, April 3, 2023**. It will be strictly enforced.

COURSE GOALS

Course Objectives

- Students will gain a clear intuitive understanding of the concept of a partial differential equation and its relevance to describing physical phenomena such as diffusion and wave propagation.
- Students will gain a deeper understanding of Fourier series by mastering the theory of boundary value problems.
- Students will learn the separation of variables method to solve linear parabolic, elliptic and hyperbolic partial differential equations.
- Students will gain practical knowledge of basic numerical techniques for solving partial differential equations using the finite difference method.
- Students will learn the basics of the spectral Fourier transform method for solving PDEs on an infinite or semi-infinite domain.

Course Outcomes

- Students can derive the heat equation from basic principles such as energy conservation and the Fourier law of heat conduction.
- Students can calculate and visualize Fourier cosine or sine series of a function of one variable.
- Students can find equilibrium solutions to heat or wave equations, and explain their physical meaning.
- Students can write down the complete solution of a linear homogeneous wave, heat or Laplace equation on a rectangular or radially-symmetric domain using separation of variables.
- Students can apply the concept of linearity to solve non-homogenous PDEs by the method of linear superposition.
- Students can solve the heat equation with Dirichlet boundary conditions using the finite difference approach and will develop a basic understanding of computational algorithms that are used to approximate numerical solutions of mathematical problems.
- Students can use the Fourier transform method to solve the heat equation and the Laplace equation in a semi-infinite plane or strip.
- Students have a grasp of the basic principles of Sturm-Liouville theory relating to boundary-value problems.
- Students can use the Rayleigh Quotient to gain information about the lowest eigenvalue and the corresponding eigenfunctions for a boundary value problem.

Course Assessment: The assessment of objectives will be achieved through homework assignments and midterm/final examinations testing the specific outcomes listed above.

POLICIES

DMS Course Policies: All DMS students must familiarize themselves with, and adhere to, the **Department of Mathematical Sciences Course Policies**, in addition to official **university-wide policies**. DMS takes these policies very seriously and enforces them strictly.

Grading Policy: The final grade in this course will be determined as follows:

Homework	25%
Midterm Exam I	20%
Midterm Exam II	20%
Final Exam	35%

Your final letter grade will be based on the following tentative curve.

A	90 - 100	C	61 - 67
B+	82 - 89	D	52 - 60
B	75 - 81	F	0 - 51
C+	68 - 74		

Attendance Policy: Attendance at all classes is **mandatory per DMS policy**. Please make sure you read and fully understand the [Math Department's Attendance Policy](#). This policy will be enforced. A couple missed lectures over the course of the semester will not impact your grade, but try and borrow notes from your classmates if you have to miss a class. See also Makeup Exam Policy below.

Email and Canvas: Important announcements will be sent via email and cross-posted in Canvas. It is important that you regularly check your NJIT email account and Canvas course page for class assignments and announcements from your instructor.

Homework and Quizzes: Homework problem sets will be posted in Canvas by the instructor each week, and may include problems requiring basic coding in MATLAB or Mathematica. All homework should be submitted via Canvas.

Exams: There will be two midterm exams during the semester and a cumulative final exam during the final exam week:

Midterm Exams	See week-by-week syllabus below
Final Exam Period	May 5 - May 11, 2023

The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and fully understand the [Math Department's Examination Policy](#). This policy will be strictly enforced.

Makeup Exam Policy: There will be **NO MAKE-UP EXAMS** during the semester. In the event an exam is not taken, and under rare circumstances where the student has a legitimate reason for missing the exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor's note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the Math Department Office/Instructor that the exam will be missed.

Cellular Phones: All cellular phones and other electronic devices must be switched off during all class times.

ADDITIONAL RESOURCES

Math Tutoring Center: Located in the Central King Building, Lower Level, Rm. G11 (See: [Spring 2023 Hours](#))

Further Assistance: For further questions, students should contact their instructor. All instructors have regular office hours during the week. These office hours are listed on the Math Department's webpage for [Instructor Office Hours and Emails](#).

Accommodation of Disabilities: The Office of Accessibility Resources and Services (OARS) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Scott Janz, Associate Director of Disability Support Services at [973-596-5417](tel:973-596-5417) or via email at scott.p.janz@njit.edu. The office is located in Kupfrian Hall, Room 201. A Letter of Accommodation Eligibility from the Office of Accessibility Resources and Services office authorizing your accommodations will be required.

For further information regarding self identification, the submission of medical documentation and additional support services provided please visit the Office of Accessibility Resources and Services (OARS) website at:

<https://www.njit.edu/accessibility/>

Important Dates (See: [Spring 2023 Academic Calendar, Registrar](#))

Date	Day	Event
January 17, 2023	Tuesday	First Day of Classes
January 23, 2023	Monday	Last Day to Add/Drop Classes
March 13, 2023	Monday	Spring Recess Begins
March 18, 2023	Saturday	Spring Recess Ends
April 3, 2023	Monday	Last Day to Withdraw
April 7, 2023	Friday	Good Friday - No Classes
May 2, 2023	Tuesday	Friday Classes Meet
May 2, 2023	Tuesday	Last Day of Classes
May 3 - May 4, 2023	Wednesday and Thursday	Reading Days
May 5 - May 11, 2023	Friday to Thursday	Final Exam Period

Course Outline (dates approximate)

Lecture (date)	Sections	Topic
1 (1-19)	1.1-1.3	Introduction: PDEs in physics; derivation of 1D heat equation & diffusion equation
2 (1-23)	1.3-1.4	Heat equation: Equilibrium solutions; boundary & initial conditions
3 (1-26)	1.5	Heat equation in higher dimensions
4 (1-30)	2.1-2.2	Linearity & superposition
5 (2-2)	2.3	Method of separation of variables: boundary value problems

6 (2-6)	3.1-3.3	Fourier series review
7 (2-9)	3.4-3.6	Fourier series continued
8 (2-13)	2.4.1-2.4.2	Solving heat equation in 1D rod: insulated ends
9 (2-16)	2.4.2-2.4.3	Solving heat equation in 1D rod: circular ring
10 (2-20)		Review for Exam 1
11 (2-23)	Exam 1	All material covered to date
12 (2-27)	8.1, 8.2	Dealing with non-homogeneous problems
13 (3-2)	2.5.1	Laplace's equation in rectangular domains
14 (3-6)	2.5.2-2.5.4	Laplace's equation: rectangular and circular domains
15 (3-9)	2.5.2-2.5.4	Laplace's equation continued
March 11-19		Spring Break
16 (3-20)	4.1-4.3	Wave equation: 1D derivation with fixed ends
17 (3-23)	4.4-4.5	1D wave equation: Separable solutions & general solution
18 (3-27)	7.1-7.3	2D wave equation: Separable solutions
19 (3-30)	7.1-7.3	2D wave equation; Review for Exam 2
20 April 3	Exam 2	All material covered since Exam 1
April 3	Last Day to Withdraw	
21 (4-6)	6.1-6.3	Finite difference numerical methods
22 (4-10)	6.1-6.3	Finite difference numerical methods
23 (4-13)	10.1-10.3	Heat equation on an infinite line; Fourier Transform derivation
24 (4-17)	10.1-10.3	Heat equation on an infinite line; Fourier Transform derivation
25 (4-20)	10.4, 10.6	More Fourier Transform problems
26 (4-24)	5.1-5.4	Sturm-Liouville and the Rayleigh Quotient
27 (4-27)	5.6,5.7	Rayleigh Quotient examples
28 May 1	Last Class: Final Exam Review	

*Updated by Professor L. Cummings - 1/17/2023
