

MATH 332: Introduction to Functions of a Complex Variable

Spring 2023 Course Syllabus

NJIT Academic Integrity Code: All Students should be aware that the Department of Mathematical Sciences takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

Please be sure you read and fully understand our [DMS Online Exam Policy](#).

COURSE INFORMATION

Course Description: Functions of a complex variable: Cauchy-Riemann equations, Cauchy-Goursat theorem, integration, series, residues, poles, geometrical aspects. Emphasis on techniques. Effective From: Fall 2010.

Number of Credits: 3

Prerequisites: [MATH 211](#) or [MATH 213](#) and [MATH 222](#) all with a grade of C or better

Course-Section and Instructors:

Course-Section	Instructor
Math 332-002	Professor E. Lushi

Office Hours for All Math Instructors: [Spring 2023 Office Hours and Emails](#)

Required Textbook:

Title	<i>Complex Variables and Applications</i>
Author	Brown
Edition	9th
Publisher	McGraw-Hill
ISBN #	978-0073383170

University-wide Withdrawal Date: The last day to withdraw with a W is **Monday, April 3, 2023**. It will be strictly enforced.

COURSE GOALS

Course Objectives

- Understand the relevance and broad importance of the theory of analytic functions.
- Learn the meaning of theorems and corollaries describing important properties of analytic functions.
- Learn the connection between the series representations and integration properties of analytic functions.
- Learn applications of the Cauchy Residue Theorem, and its use in calculating certain definite integrals.
- Learn how to apply knowledge of analytic functions to problems in applied math, science and engineering.

Course Outcomes

- Students gain knowledge of the theory of analytic functions of a complex variable, and its broad applicability.
- Students gain a deeper understanding of common elementary transcendental functions through the knowledge of their properties in the complex plane.
- Students are prepared for further study in more advanced mathematics, science and engineering courses.
- Students can apply their knowledge of the theory of analytic functions to solve problems in applied mathematics, fluid dynamics, electrodynamics, and other areas of science and engineering.

Course Assessment: The assessment of objectives is achieved through homework assignments, and in-class quizzes, midterm and final examinations.

POLICIES

DMS Course Policies: All DMS students must familiarize themselves with, and adhere to, the [Department of Mathematical Sciences Course Policies](#), in addition to official [university-wide policies](#). DMS takes these policies very seriously and enforces them strictly.

Grading Policy: The final grade in this course will be determined as follows:

Homework and Quizzes: 30%	Midterm Exams: 30%	Final Exam: 40%
---------------------------	--------------------	-----------------

A **passing final letter grade** will be based on the following tentative cutoffs:

A	90 - 100	C+	66 - 75
B+	82 - 89	C	58 - 65
B	74 - 81	D	50 - 57

Attendance Policy: Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the [Math Department's Attendance Policy](#). This policy will be strictly enforced.

Homework and Quiz Policy: Homework problem sets will be posted on the [course canvas page](#) at the end of each week, based on the material covered that week. Late homework will not be accepted. Short quizzes will be given at the end of the class on Tuesdays based on the material covered in the previous week.

Exams: There will be one midterm exam and one comprehensive final exam. The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and understand the [Math Department's Examination Policy](#). This policy will be strictly enforced.

Makeup Exam Policy: There will be **NO MAKE-UP EXAMS** during the semester. If an exam is not taken under rare circumstances where the student has a legitimate reason for missing the exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor’s note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the Math Department Office/Instructor that the exam will be missed.

Cellular Phones: All cellular phones and other electronic devices must be switched off during all class times.

ADDITIONAL RESOURCES

Math Tutoring Center: Located in the Central King Building, Lower Level, Rm. G11 (See: [Spring 2023 Hours](#))

Further Assistance: For further questions, students should contact their instructor. All instructors have regular office hours during the week. These office hours are listed on the Math Department’s webpage for [Instructor Office Hours and Emails](#).

Accommodation of Disabilities: The Office of Accessibility Resources and Services (OARS) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Scott Janz, Associate Director of Disability Support Services at [973-596-5417](tel:973-596-5417) or via email at scott.p.janz@njit.edu. The office is located in Kupfrian Hall, Room 201. A Letter of Accommodation Eligibility from the Office of Accessibility Resources and Services office authorizing your accommodations will be required.

For further information regarding self identification, the submission of medical documentation and additional support services provided please visit the Office of Accessibility Resources and Services (OARS) website at:

<https://www.njit.edu/accessibility/>

Important Dates (See: [Spring 2023 Academic Calendar, Registrar](#))

Date	Day	Event
January 17, 2023	Tuesday	First Day of Classes
January 23, 2023	Monday	Last Day to Add/Drop Classes
March 13, 2023	Monday	Spring Recess Begins
March 18, 2023	Saturday	Spring Recess Ends
April 3, 2023	Monday	Last Day to Withdraw
April 7, 2023	Friday	Good Friday - No Classes
May 2, 2023	Tuesday	Friday Classes Meet
May 2, 2023	Tuesday	Last Day of Classes
May 3 - May 4, 2023	Wednesday and Thursday	Reading Days
May 5 - May 11, 2023	Friday to Thursday	Final Exam Period

Course Outline

Date	Sections	Topic	
January 17	1	1-5	Complex Algebra; Vectors & Moduli; Complex Conjugate
January 20	2	6-11	Polar Representation; Products & Powers in Exponential Form; Roots
January 24	3	12	Regions in the Complex Plane
January 27	4	13-14	Functions of Complex Variable; Mappings
January 31	5	15-18	Limits and Continuity
February 3	6	19-23	Derivatives & Analyticity; The Cauchy-Riemann Equations
February 7	7	24-26	Analyticity; Cauchy-Riemann Equations in Polar Coordinates, Harmonic
February 10	8	27-29	Functions; Uniquely Determined Functions; Reflection Principle
February 14	9	30-36	The Exponential and Logarithm, The Power Function
February 17	10	37-39	Trigonometric and Hyperbolic Functions
February 21	11	40	Inverse Trigonometric & Inverse Hyperbolic Functions
February 24	12	41-49	Contour Integrals; Fundamental Theorem of Calculus
February 28	13	50-53	The Cauchy-Goursat Theorem
March 3	14	54-56	The Cauchy Integral Formula
March 7	15		MIDTERM
March 10	16	57-59	The Extensions of the Cauchy Integral Formula
March 13-18	Spring Break		
March 21	17	60-65	Taylor Series; Power Series Convergence
March 24	18	66-68	Laurent Series
March 18	19	69-71	Uniform Convergence; Integration & Differentiation of Power Series
March 31	20	72-73	Series Multiplication and Division
April 4	21	74-80	Cauchy's Residue Theorem, Zeros and Singularities
April 7	Good Friday - no class		
April 11	23	81-84	The Point at Infinity
April 14	24	85-87	Improper Integrals from Fourier Analysis
April 18	25	88	Improper Integrals Continued: Jordan's Lemma
April 21	26	89-90	Integrals Involving Indented Contours
April 25	27	91	Integration along a Branch Cut
April 28	28	92	Definite Integrals Involving Sines and Cosines
May 2	29	REVIEW FOR FINAL EXAM	

*Updated by Professor E. Lushi - 1/4/2023
Department of Mathematical Sciences Course Syllabus, Spring 2023*
