

## MATH 661: Applied Statistics

### *Spring 2023 Course Syllabus*

**NJIT Academic Integrity Code:** All Students should be aware that the Department of Mathematical Sciences takes the University Code on Academic Integrity at NJIT very seriously and enforces it strictly. This means that there must not be any forms of plagiarism, i.e., copying of homework, class projects, or lab assignments, or any form of cheating in quizzes and exams. Under the University Code on Academic Integrity, students are obligated to report any such activities to the Instructor.

### COURSE INFORMATION

**Course Description:** Role and purpose of applied statistics. Data visualization and use of statistical software used in course. Descriptive statistics, summary measures for quantitative and qualitative data, data displays. Modeling random behavior: elementary probability and some simple probability distribution models. Normal distribution. Computational statistical inference: confidence intervals and tests for means, variances, and proportions. Linear regression analysis and inference. Control charts for statistical quality control. Introduction to design of experiments and ANOVA, simple factorial design and their analysis. **MATH 661** and **MATH 663** cannot both be used toward degree credits at NJIT.

**Number of Credits:** 3

**Prerequisites:** **MATH 112**

**Course-Section and Instructors:**

Course-Section	Instructor
Math 661-1J2	Professor A. Pole

**Office Hours for All Math Instructors:** [Spring 2023 Office Hours and Emails](#)

**Required Textbook:**

Title	<i>Introduction to the Practice of Statistics</i>
Author	Moore, McCabe, and Craig
Edition	10th
Publisher	MacMillan Learning
ISBN #	1. E-book ISBN:9781319377656 2. Loose-Leaf ISBN:9781319383985 3. Paperback ISBN:9781319244446

	** We will be using the Macmillan Achieve system for some assignments - details to come
--	---

**University-wide Withdrawal Date:** The last day to withdraw with a W is **Monday, April 3, 2023**. It will be strictly enforced.

**COURSE GOALS**

**Course Objectives**

This course will acquaint students with statistical techniques, with emphasis on applications.

**Course Outcomes**

On successful completion of this course, the student will be able to:

- Demonstrate understanding of statistical methods for summarizing and displaying data
- Demonstrate knowledge of basic probability and inference
- Demonstrate conceptual understanding of sampling distributions and the central limit theorem
- Perform statistical analysis including estimation, hypothesis testing, and analysis of variance.

**Course Assessment:** Assessment of objectives is achieved through homework assignments and two examinations: a midterm exam and a comprehensive final exam.

**POLICIES**

**DMS Course Policies:** All DMS students must familiarize themselves with, and adhere to, the **Department of Mathematical Sciences Course Policies**, in addition to official **university-wide policies**. DMS takes these policies very seriously and enforces them strictly.

**Grading Policy:** The final grade in this course will be determined as follows:

<b>Homework</b>	40%
<b>Midterm Exam</b>	30%
<b>Final Exam</b>	30%

**Attendance Policy:** Attendance at all classes will be recorded and is **mandatory**. Please make sure you read and fully understand the **Math Department’s Attendance Policy**. This policy will be strictly enforced.

**Using Respondus LockDown Browser and a Webcam for Online Exams**

Respondus LockDown Browser is a locked browser for taking assessments or quizzes in Canvas. It prevents you from printing, copying, going to another URL, or accessing other applications during a quiz. If a Canvas quiz requires that LockDown Browser be used, you will not be able to take the assessment or quiz with a standard web browser. You may be required to use LockDown Browser with a webcam (Respondus Monitor), which will record you during an online exam.

**This course requires the use of Respondus LockDown Browser and/or Respondus Monitor with a webcam for online exams.** The webcam can be built into your computer or can be the type that plugs in with a USB cable. Watch this **short video** to get a basic understanding of LockDown Browser and the webcam feature. A

student [Quick Start Guide \(PDF\)](#) is also available.

1. Download and install LockDown Browser from this link:<http://www.respondus.com/lockdown/download.php?id=264548414>
2. Once your download has finished, locate the “LockDown Browser” shortcut on the desktop and double-click it. (For Mac users, launch “LockDown Browser” from the Applications folder.)
3. You will be brought to the Canvas login page within the LockDown Browser, click “Login with your UCID” to log in with your NJIT UCID and password and then click Login.
4. Under “My courses”, click on the course in which you have to take the exam that requires the LockDown Browser.
5. After you enter the course, find the exam and click on it.
6. A confirmation prompt will appear, click the “Start attempt” button. Once a quiz has been started with LockDown Browser, you cannot exit until the Submit all and finish button is clicked.
7. If you are required to use a webcam (Respondus Monitor), you will be prompted to complete a Webcam Check and other Startup Sequence steps.

**Exams:** There will be one midterm exam during the semester and a cumulative final exam during the final exam week:

Midterm Exam	Week 9
Final Exam Period	May 5 - May 11, 2023

The final exam will test your knowledge of all the course material taught in the entire course. Make sure you read and fully understand the [Math Department's Examination Policy](#). This policy will be strictly enforced.

**Makeup Exam Policy:** There will be **NO MAKE-UP QUIZZES OR EXAMS** during the semester. In the event an exam is not taken under rare circumstances where the student has a legitimate reason for missing the exam, the student should contact the Dean of Students office and present written verifiable proof of the reason for missing the exam, e.g., a doctor’s note, police report, court notice, etc. clearly stating the date AND time of the mitigating problem. The student must also notify the Math Department Office/Instructor that the exam will be missed.

**Cellular Phones:** All cellular phones and other electronic devices must be switched off during all class times.

## **ADDITIONAL RESOURCES**

**Further Assistance:** For further questions, students should contact their instructor. All instructors have regular office hours during the week. These office hours are listed on the Math Department's webpage for [Instructor Office Hours and Emails](#).

**Accommodation of Disabilities:** The Office of Accessibility Resources and Services (OARS) offers long term and temporary accommodations for undergraduate, graduate and visiting students at NJIT.

If you are in need of accommodations due to a disability please contact Scott Janz, Associate Director of Disability Support Services at [973-596-5417](tel:973-596-5417) or via email at [scott.p.janz@njit.edu](mailto:scott.p.janz@njit.edu). The office is located in Kupfrian Hall, Room 201. A Letter of Accommodation Eligibility from the Office of Accessibility Resources and Services office authorizing your accommodations will be required.

For further information regarding self identification, the submission of medical documentation and additional support services provided please visit the Office of Accessibility Resources and Services (OARS) website at:

Important Dates (See: [Spring 2023 Academic Calendar](#), Registrar)

Date	Day	Event
January 17, 2023	Tuesday	First Day of Classes
January 23, 2023	Monday	Last Day to Add/Drop Classes
March 13, 2023	Monday	Spring Recess Begins
March 18, 2023	Saturday	Spring Recess Ends
April 3, 2023	Monday	Last Day to Withdraw
April 7, 2023	Friday	Good Friday - No Classes
May 2, 2023	Tuesday	Friday Classes Meet
May 2, 2023	Tuesday	Last Day of Classes
May 3 - May 4, 2023	Wednesday and Thursday	Reading Days
May 5 - May 11, 2023	Friday to Thursday	Final Exam Period

## Course Outline

Week	Topic
1 & 2	<i>Chapter 1. Looking at data distributions.</i>
3	<i>Chapter 2. Looking at data relationships.</i>
4 & 5	<i>Chapter 4. Probability: The study of randomness</i>
6 & 7	<i>Chapter 5. Sampling distributions</i>
8	<i>MIDTERM EXAM</i>
9	<i>SPRING BREAK</i>
10 & 11	<i>Chapter 6. Introduction to inference.</i>
12	<i>Chapter 7. Inference for means</i>
13	<i>Chapter 8. Inference for proportions</i>
14	<i>Chapter 9. Analysis of two-way tables</i>
15	<i>Chapter 12. One way analysis of variance</i>
Exam Week	<i>FINAL EXAM</i>
