

**Spring 2020 Syllabus Addendum
Transitioning to Online Instruction**

Math 105–012

Course Title: Elementary Probability and Statistics

Instructor: Professor C. Oton

Date: March 18, 2020

Pursuant to the need for digital learning for the remainder of the Spring 2020 semester, the following course adjustments are being implemented:

- **Course Lecture and Office Hours** – Lectures for the course will take the form of pre-recorded videos of instruction and mandatory attendance in a digital platform (Canvas Conference). It is expected that students attend lecture as usual (same times and days), with the aim to ask questions, see examples worked out, etc. Office hours will be conducted over Canvas Conference as well. The instructor may require office hour attendance if deemed necessary for a student's success.
- **Online Homework** – Online homework will proceed as usual.
- **Quizzes** – Quizzes will take place on Canvas with the use of the Lockdown Browser and Respondus. These measures ensure that testing integrity is maintained, and work can be accurately graded.
- **Exams** – Exams will be administered with the use of the Lockdown Browser and Respondus. Additional steps may need to be taken to allow for supporting work to be submitted.
- **Attendance** – Attendance at all gatherings of the class continue to be Mandatory. It is essential that we maintain normalcy in our courses to ensure success for the students.
