Hurricane Sandy has had a significant impact on many students making it difficult for some to be fully prepared for the second common exam. To help students recover academically, the grade on the second common exam will be replaced by the higher of

- the grade received on the second common exam and
- the grade on the final exam.

This policy allows students a second chance to learn and to demonstrate that they have learned the important material on the second common exam.

This policy does not apply to Math 107 because grading in that course already accounts for grade replacement for work on subsequent exams.
